del Lazio e della Toscana M. Aleandri

Universität  
Zürich <sup>UZH</sup>

The ECHINO-SAFE-MED project is intensively dedicated to training and capacity building with the goal of facilitating the exchange of key personnel from one laboratory to another to improve cohesion and implementation of project activities, share skills, expertise, tools and equipment, and transfer methodologies. Special attention will be given to the training of young junior scientists

Franck Boue (ANSES, France) visited the UNINA team in Italy (May 2022) and the VRI-HAO team in Greece (June 2022) to participate in field activities in the pilot areas and to train each team in the use of the FTA® cards for sampling hydatid cysts during slaughterhouse activities
